

We are writing to you regarding the possible displacement of K-LOVE 106.7 Radio from the FM dial by the proposed Low Power FM (LPFM). As members of the local community, we rely on K-LOVE as a 'healthy' alternative to the other radio stations available in our area, which are mostly fraught with profanity, sexual comments, and negativity. We have been blessed by K-LOVE daily as the music and comments uplift and encourage us. K-LOVE is a totally listener-supported radio station, and we are financial supporters of the station. Since K-LOVE is listener supported, they are not under the influence of any outside agency that might want to water down its message of Salvation through Jesus Christ. If K-LOVE was not around, we would not have that same assurance from other stations that make their living from the selling of commercial air time. Actually, we only listen to listener supported radio, since the other radio station we listen to is WCPE, the Classical Station, 89.7 FM. We like those stations because we, the consumers, determine what we get to listen to, not some corporation or an ad agency on Madison Ave. Keeping K-LOVE is in the public interest because it is the only place where families can listen together to positive and encouraging music without having to worry what might be said that might be detrimental to the kids. We would appreciate your consideration of our comments. Thank you, David & Laurel Emigh
